Sales price $2,850.00

Ask a question about this product

Description

Nucleofected cells are ready for analysis after a short incubation time of only 2 – 8 hours.

DNA quality:

1 – 5 µg plasmid concentration per nuclefection sample (100 µl), plasmid concentration can be increased up to 10 µg per sample. This may lead to higher gene transfer efficiencies, but at the same time may increase mortality of the cells.

Cell density:

2 x 105 – 1 x 107 cells per nucleofection sample for suspensions cells

2 x 105 – 2 x 106 cells per sample for adherent cells

Cell densities of < 2 x 105 cells per sample are not advisable because the gene transfer efficiency may decrease and mortality may increase.

Dimensions (WxDxH): 300 x 230 x x110 mm

Weight: 2.5 kg

Comes with our 90-day warranty.

Biotech Equipment Sales, Inc., based in South San Francisco, the Biotech capital of the world, since 2009. We are dedicated to bringing high-quality pre-owned laboratory instrumentation to our scientific community.
