Description

The Invitrogen PowerEase Touch 600W (models PS0600 / PS0601 etc.) is a high-power electrophoresis power supply from Thermo Fisher Scientific. It features a modern 4.3-inch color touchscreen interface and delivers up to 500 V, 3 A (3000 mA), and 600 W. This makes it ideal for demanding applications such as running and transferring mini/midi protein gels (SDS-PAGE, native PAGE), IEF, western blotting, and DNA/RNA electrophoresis. It supports simultaneous operation of multiple gel tanks via four output pairs. This is a powerful, user-friendly unit well-suited for busy molecular biology labs.

Key Features & Specifications
High Output Capacity — Maximum 500 V, 3 A (3000 mA), and 600 W; supports constant voltage, constant current, or constant power modes with programmable limits

Intuitive Touchscreen Interface — 4.3-inch backlit LCD with pre-programmed protocols for common gels/transfers, custom method creation, timers (up to 999 min), and real-time monitoring

Four Output Pairs — Four sets of terminals (4 positive + 4 negative) allow running/transferring multiple electrophoresis units simultaneously.
Safety & Usability Features — Over-voltage, over-current, over-temperature, and no-load protection; stackable design with adjustable viewing angle feet; audible alarms and user-adjustable settings (brightness, beep volume, etc.).
Compact & Versatile Design — Dimensions approx. 9 × 12 × 4 inches (23 × 30 × 10 cm); weight ~2.8 kg; universal power input (115/230 VAC, 50/60 Hz); suitable for both routine and high-current applications like midi gels and blotting.

Comes with our 90-day warranty.

Biotech Equipment Sales, Inc. has been based in South San Francisco, the Biotech capital of the world, since 2009. We are dedicated to bringing high-quality pre-owned laboratory instrumentation to our scientific community.
