ManufacturerBioTek

Description
The BioTek 50TS (REF 50TS16V, SN 1901054, manufactured 2019-01-09) is a compact automated microplate washer made in the USA by BioTek Instruments (now Agilent). This configuration supports 96- and 384-well plates with automated buffer switching. It delivers reliable, high-

performance washing for ELISA and other laboratory workflows at an affordable price point. The unit pairs well with systems such as the BioTek 800 TS absorbance reader for complete plate-washing workflows.

Key Features

4.3-inch color LCD touchscreen – Intuitive menu-driven interface for quick operation, predefined protocols, and creation/editing of up to 75 custom wash protocols (with optional LHC software for computer control).
96-/384-well washing with 16-well Dual-Action manifold – Handles standard and low-profile plates; supports full or partial plate washing with programmable volumes (25–3,000 µL/well) and 1–10 cycles.
Automated buffer switching (“V” configuration) – Automatically selects and switches among up to 3 buffers/reagents for complex multi-step protocols or maintenance without manual intervention.
Application versatility – Optimized for ELISA and cell-based assay washing (adjustable fluid delivery for gentle handling); modular options available for biomagnetic separation or vacuum filtration (bead-based assays).
Automated maintenance + high performance – Built-in daily and overnight cleaning routines prevent clogging and ensure consistent results; typical performance includes high dispense precision (?3–4% CV depending on manifold/plate) and low residual volumes.

Comes with our 90-day warranty.

Biotech Equipment Sales, Inc.: based in South San Francisco, the Biotech capital of the world, since 2009. We are dedicated to bringing high-quality pre-owned laboratory instrumentation to our scientific community.
