ManufacturerEppendorf

Description

The Eppendorf 5430R is a compact, high-performance refrigerated benchtop centrifuge that combines the small footprint of a microcentrifuge with the versatility of a multipurpose unit. It supports a wide range of applications with its included FA-45-30-11 fixed-angle rotor (30 × 1.5/2.0

mL microtubes, max 14,000 rpm / 20,817 × g) and accommodates additional rotors for tubes, PCR strips, microplates, and 15/50 mL conical tubes. Temperature control ranges from -11°C to +40°C, making it ideal for sensitive samples in molecular biology, biochemistry, and clinical labs. This cross-over centrifuge offers excellent value for labs needing both high-capacity micro-volume spins and broader sample handling in a space-saving refrigerated package.

Key Features:
High-Speed & Refrigerated Performance — Reaches up to 17,500 rpm (30,130 × g) with fast acceleration/braking; precise temperature control (-11°C to +40°C) protects temperature-sensitive samples like proteins, DNA, and RNA.
Versatile Rotor Compatibility — Includes the 30-place FA-45-30-11 aerosol-tight fixed-angle rotor for 1.5/2.0 mL tubes; supports up to 12 different rotors, including options for 48 × 1.5/2.0 mL, PCR strips, microplates, and 15/50 mL tubes.
Compact & Ergonomic Design — Small footprint with low access height, soft-touch one-finger lid closure, and quiet operation (<54 dB(A) with the included rotor), perfect for crowded benches.
User-Friendly Operation — Menu-driven multilingual interface (with large backlit display or rotary knobs), programmable short-spin function, SOFT brake, and continuous run mode for flexible workflows.
Safety & Reliability — Aerosol-tight rotors available, automatic rotor recognition, imbalance detection, and robust construction for consistent, safe performance in daily lab use.

Comes with our 90-day warranty.

Biotech Equipment Sales, Inc.: based in South San Francisco, the Biotech capital of the world, since 2009. We are dedicated to bringing high-quality pre-owned laboratory instrumentation to our scientific community.
