Description

Research grade sample preparation system

An efficient solution for high-throughput sample preparation. This system quickly and effectively disrupts and homogenizes biological samples, with an emphasis on preventing cross-contamination. It's versatile, capable of processing diverse sample types, and integrates well with QIAGEN's tissue management workflow. The TissueLyser II releases high-quality DNA, RNA, and proteins, aiding further purification and analysis. It's an essential tool for enhancing biomolecule yields in genotyping, gene expression, and proteomics applications.

Specifications:

Capacity: up to 192 samples simultaneously, depending on the adaptors used

Sample Size: 1.2ml collection microtubes

Oscillation Frequency: 3 - 30 Hz (180 - 1800 oscillations per minute)

Sample Disruption Type: bead mill

Power Requirements: 120V 15A

Voltage: 100-240V

Frequency: 50/60Hz

Power: 150W

Fuse: T; 3.15A (2x)

Comes with our 90-day warranty.

Biotech Equipment Sales, Inc.: based in South San Francisco, the Biotech capital of the world, since 2009. We are dedicated to bringing high-quality pre-owned laboratory instrumentation to our scientific community.
