Description

!!!! - RECENTLY SOLD - !!!!

- Multi-Assay Filter Cylinder houses eight easily-changeable filters for four different applications.
- Wide wavelength range: measures fluorescence from UV to red range
- Automatic Range Optimization: range, gain, and resolution are set automatically - eliminates operator error from working in the wrong range.
- Multi-point calibration: stores a 1-to-5 point calibration curve for quantitative determinations.
- Kinetics Software: outputs data to a computer or printer at selectable intervals.
- Versatile Sample Compartment accommodates 25 x 150 mm round, 13 x 100 mm round, 10 x 10 mm square cuvettes, 100 μ l minicell, or 9 μ l microcell.
- Menu-Driven Software guides the user through calibration and analysis.
- RS-232 for serial data output to a printer or computer.
