ManufacturerVWR

Description
VWR Air Jacketed CO? Incubator, model VWR51014992, manufactured by Thermo Fisher Scientific, is a laboratory-grade 6.5 cu ft (?184 L) air-jacketed incubator designed for cell and tissue culture. The specific model uses an independent infrared (IR) CO? sensor. 115 V, 50/60 Hz, 9.6 A single-phase power.

Key Features

Air-jacketed temperature control — Maintains ambient +5 °C to 50 °C with excellent uniformity (typically ±0.3 °C at 37 °C) and rapid recovery after door openings, ideal for stable cell-culture conditions.

Independent IR CO? sensor — Provides accurate 0–20 % CO? control with ±0.1 % precision; the IR sensor is unaffected by chamber temperature or humidity changes (unlike thermal-conductivity models).
On-demand high-heat sterilization cycle — Features a 140 °C sterilization mode for thorough decontamination of internal surfaces between uses (IR sensor must be removed beforehand).
Contamination control and humidity — In-chamber HEPA filtration helps protect cultures from airborne contaminants; relative humidity up to ?95 % at 37 °C via a water pan; stainless-steel interior with tool-free cleaning.
Stackable design and safety certifications — 6.5 cu ft chamber (internal ?21.3? W × 26.8? H × 20? D) that can be double-stacked to save lab space; UL-listed laboratory equipment with over-temperature protection and digital controls. Electrical rating matches the plate (115 V, 9.6 A).

Comes with our 90-day warranty.

Biotech Equipment Sales, Inc.: based in South San Francisco, the Biotech capital of the world, since 2009. We are dedicated to bringing high-quality pre-owned laboratory instrumentation to our scientific community.
