Description

The VWR CryoPro Standard Auto-Fill Systems are designed for safe and efficient storage of samples in vapor or liquid phase nitrogen. Featuring a robust steel and fiberglass cabinet, these large-capacity units offer auto-fill convenience, high vial capacities, and a user-friendly digital temperature display. A multicolored bar simplifies setup and monitoring of liquid levels. Equipped with alarms for high temperature, high/low liquid levels, and low LN₂ supply, the systems ensure sample security. Additional features include remote alarm contacts, casters for mobility, built-in lid locks, and a sealed center shaft to prevent LN₂ spurting.

Specifications:

Storage Options: Vapor or liquid phase

Cabinet Material: Steel and fiberglass

Features: Auto-fill, digital temperature display, remote alarm contacts, easy setting options

Alarms: High temperature, high/low liquid levels, low LN₂ supply

Safety: Sealed center shaft, built-in lid locks

Mobility: Mounted on casters

Capacity: High vial capacities

Comes with our 90-day warranty.
